

# Marking & Measuring

## Center Finding Rules

Eliminate guesswork, math and the use of dividers. To find center simply align the rule so the same measurement appears to the left of the "0" mark as appears to the right of the mark. The arrow will point to the exact center. Available in 12" and 24" lengths. Aluminum rules are 1 3/4" wide, stainless are 1 1/4".

- 04F32** (A) 12" hardened aluminum ..... \$9.99
- 04F33** (A) 24" hardened aluminum ..... \$13.99
- 123022** (B) 12" stainless ..... \$10.50
- 123041** (B) 24" stainless ..... \$12.50

## Flexible Curves

Let you draw a perfectly contoured curve without measuring and help in transferring curved designs from plans or originals. Just bend to any curve down to a 1" radius-they'll hold it, without springback, as long as you need it. Made with a lead core completely enclosed in flexible plastic. One side has a raised edge for inking.

- 16M32** 24" without markings ..... \$10.99
- 16M41** 30" without markings ..... \$14.50
- 16M61** 20" (50cm) calibrated ..... \$14.99

## Plastic Profile Copy Gauges

Reproduce any furniture trim or moulding profile to form an accurate template for tracing and cutting. An excellent alternative to wire models, these gauges are made of durable plastic. Fingers measure 1/16" W x 3/4" H x 4" L, and will not fall out or cross over each other. Copies shapes up to 1 3/4" deep. Two or more may be connected together for reproducing shapes longer than an individual copy gauge.

- 144814** standard 6" width ..... \$8.99
- 144815** large 10" width ..... \$15.99

## Buffing Wheels and Compounds

Put a razor sharp edge on your cutting tools and polish metals around the shop or home, too! Wheels mounted on a polishing head, arbor, or hand drill are dressed with one of our buffing compounds to turn them into very effective rotating strops and polishers. We highly recommend these systems for quick honing of edge tools.

(A) **Buffing Wheels** of sewn muslin are 80 ply and maintain a wide working surface for polishing bevels and curved surfaces of carving tools, knives, turning tools or buffing brass hardware and household metalware. Each has a 5/8" hole.

- 07M04** 8" x 1" ..... \$18.50
- 07M71** 6" x 1" ..... \$14.50

(B) **Felt Buffing Wheels** provide a superior honing medium for tools requiring a more rigid surface than muslin wheels which can "round over" cutting edges. The soft wheel provides just enough "give" for curved edges such as carving gouges, while the medium and hard are perfect for straight-edged tools like chisels, plane blades, and knives. 6 1/8" x 3/4" with 5/8" arbor hole.

- 03B12** soft ..... \$25.99
- 03B11** medium ..... \$27.99
- 03B13** hard ..... \$33.99

(C) **Bushing** reduces 5/8" arbor hole to 1/2".

- 11N61** ..... \$2.50

(D) **Portable 4" Buffing Wheels.** Just mount the 4" wheel of your choice on the special arbor and you can turn your electric hand drill into a sharpening and polishing machine. Arbor fits drill presses and motor chucks, too. All wheels 1/2" wide sewn muslin with 1/2" arbor holes.

- 08G41** 4" hard ..... \$8.50
- 08G51** 4" medium ..... \$8.50
- 08G61** 4" soft ..... \$8.50

1/2" **Arbor Adapter.** This double-flanged arbor accepts all the above 4" wheels. Its 1/4" shaft chucks into all portable drills. Not illustrated.

- 08H44** ..... \$5.50

(E) **Buffing Compounds.** Simply hold against a rotating muslin, felt, or leather wheel to apply. Compounds work great on flat barber's-type bench strops, too. Bars measure about 9" x 2" x 2", tubes measure 5" x 1" diameter.

**Emery Compound** for quick cutting, sharpening, and coloring tool steel, iron, and hard metals. This is the workhorse for removing fine scratches left by whetting or grinding.

- 07M03** 2 1/2 lb. gray bar ..... \$16.99
- 08F82** 3.5 oz. gray tube ..... \$7.99

**Tripoli.** A medium cut and coloring compound for preliminary buffing a mirror finish on all tools and decorative metal work.

- 01T41** 2 lb. red bar ..... \$10.99
- 08F81** 3.5 oz. brown tube ..... \$6.99

**Jeweler's Rouge.** A premium buffing compound for the final polishing of steel, brass, copper, pewter, gold, and aluminum. This fine compound is the one to use for producing a brilliant high reflective finish.

- 04B52** 2 1/4 lb. white bar ..... \$16.99
- 08F83** 3.5 oz. red tube ..... \$8.99

**Compound Sets** includes one emery, tripoli and jeweler's rouge stick listed above.

- 08S30** set of 3 bars Save Over \$12! .. \$32.50
- 08F80** set of 3 tubes Save Over \$5! .. \$18.50

(F) **Rake.** After a number of applications of abrasive compound to a buffing wheel, the cloth plies bind together and become glazed. The rake's teeth strip the compound away and expose a fresh working surface.

- 07M05** ..... \$26.99

## Oval/Circle Drawing Tool

Draw circles from 8" to 24" in diameter and ovals from 11" to 30" (long axis). No more strings and pencils or trying to remember which issue of your favorite woodworking magazine had that tip for drawing ovals. Complete with marking pencil and instructions.

- 123842** ..... \$19.99

## Micro Fine Honing Compound

This green, chromium oxide compound works well with leather power strops and felt wheels operating at or below the 1,750 RPM range. Charge your leather bench strops for superior hand-honing of tools. The .5 micron particle size leaves a cutting edge on your plane irons, chisels, and carving tools razor sharp, and with a mirror finish. 20 oz. bar.

- 06L01** ..... \$20.99

### Razor Sharp Edgemaking System

Absolutely The Fastest, Easiest Way To Put An Edge On Tools That We Have Ever Seen!

In fact it impressed us so much that we kept the system set up in our shop and now hone all of our tools with it before each use. Two laminated paper wheels, one for grinding and one for buffing, fit any 5/8" arbor bench grinders (includes spacer to adapt to 1/2" arbors). The use of the silicon carbide grinding compound and jewelers rouge buffing compound on the two wheels allows you to produce a mirror finish while virtually eliminating the chance of "bluing" your tool (the grease on the silicon carbide wheel acts as both a lubricant and cooling agent). Lightly grind your blade with the silicon carbide/conditioning grease wheel until you feel a wire edge, then polish the burr off with the jewelers rouge buffing wheel. System is complete with grinding and buffing wheels, extra silicon carbide (enough for about 30 recoatings), conditioning grease, jewelers rouge, and instructions for mounting, truing and recoating wheels, and sharpening with the Edgemaking System.

**124629** ..... \$34.99  
**124630** repl. grit/grease/rouge pack..... \$11.99

**Razor Sharp Edgemaking 1/4" "Shapers"** put razor sharp, polished edges on all of those small, difficult to sharpen gouges and V-tools. These laminated paper wheels are easily shaped with coarse sandpaper to match a tool's profile. Multiple "shapers" can be mounted on a single mandrel or grinder shaft by using 1/4" x 3" plywood spacer discs between the wheels. Complete 1/4" Shaper Kit contains four 1/4" x 8" wheels, silicon carbide (enough for about 60 coatings), conditioning grease, jewelers rouge, and instructions. 1/4" wheels may be purchased separately for use with your existing Edgemaking System.

**126101** 1/4" shaper kit..... \$32.99  
**126102** repl. wheel ..... \$7.99

### Slipstrop

With the included Flexcut Gold polishing compound, the Slipstrop works to keep an edge on carving tools that is unsurpassed. The Slipstrop is specially molded to polish and deburr hard to reach areas inside V tools and gouges, as well as do a fine job on outside bevels. The Flexcut Gold polishing compound applies to the strop like a crayon, and quickly polishes hardened steel. Together, the two produce the finest possible edge for carving tools.

**143657** ..... \$13.99

### 8" Slow Speed Grinder

Quiet, smooth 3/4 HP, 1725 RPM slow speed grinder is great for sharpening tools without generating the tool destroying heat that you get so quickly from 3450 RPM grinders. Unlike most grinders this slow speed grinder comes equipped with 1" x 8" 120 grit and 60 grit white aluminum oxide grinding wheels. Includes tool rests and spark/chip deflector shields. 40 lb., China.

**144290** ..... \$94.99

### Blue Aluminum Oxide Grinding Wheels

These blue wheels are the perfect compliment to your finer grit white or pink aluminum oxide wheels. Designed specifically for grinding HSS steel, they resist glazing and grooving but allow you to quickly repair a nicked tool or reshape a grind. 6" diameter wheels come with bushings to reduce the arbor hole to fit 3/4", 5/8" and 1/2" shafts. 8" wheels have reducer bushings to fit 3/4" and 5/8" shafts.

	80 grit	Dia.	Width	
<b>129762</b>	6"	3/4"		\$24.99
<b>129761</b>	8"	1"		\$29.99

### Leather Powerstrops™

Put a razor-sharp honed edge on all your carving or bench tools! For use with your power drill or chucked motors and polishing heads. These laminated leather wheels act as rotating strops for fast honing action. Treated leather stays firm under pressure and holds abrasive compounds longer for more efficient use. Each includes a stick of jeweler's rouge and 1/4" threaded arbor. Not to exceed 600 RPM.

**Vee Powerstrop** makes honing veiners, V-parting tools, and small radius gouges an easy task. 3 1/2" diameter x 3/8" thick.  
**15T21** ..... \$21.50

**Wheel Powerstrop** is a real workhorse for sharpening knives, chisels, or gouges. 3 1/2" diameter x 3/4" thick.

**08R31** ..... \$23.99  
**15T31** vee & wheel set Save Over \$10! \$34.99

### Improve Your Grinder's Performance!

**Aluminum Oxide Grinding Wheels** are a giant step above the conventional gray, hard, slow cutting wheels which tend to burn tools as the surface becomes dull and glazed. Made of granulated aluminum oxide with a vitrified white bond, they allow the grains of abrasive to wear off, thus providing a consistently fresh grinding surface. Sharpening is faster, with less danger of taking the temper out of the tool. 6" dia. wheels come with bushings to reduce the arbor hole to fit 3/4", 5/8", and 1/2" shafts. 8" wheels have reducer bushings to fit 3/4" and 5/8" shafts.

	60 Grit	120 Grit	Dia.	Width	
<b>01W44</b>			6"	3/4"	\$19.99
<b>01W48</b>			8"	1"	\$31.99

**Pink Aluminum Oxide Grinding Wheels** provide you with all the benefits of white aluminum oxide Wheels with the added bonus of being more resistant to grooving when reshaping or heavy sharpening is required. Although their bond is slightly stronger, they still allow the grains of abrasive to wear off rather than becoming dull and glazed. Since they do not clog up with metal particles or glaze over, heat build up is reduced thereby preventing "blued" tools. We've found that these wheels are particularly effective when sharpening a lot of HSS turning tools.

	60 Grit	120 Grit	Dia.	Width	
<b>127250</b>			6"	3/4"	\$25.99
<b>127252</b>			8"	1"	\$30.99

### Woodcraft's Sharpening Service

We've put the finest cutting edges on countless numbers of tools throughout the years.

Except for our Swiss Made carving tools, most of our edge tools require sharpening or honing before use. We will expertly sharpen your new tool if you request the service from your order taker when you place your order. This option is also available online and in our stores.

**New & Used Edge Tools.** Includes chisels, carving tools, plane blades, micro carving, shavehooks, inshaves, drawknives and turning tools.

# Sharpening

## JET Slow Speed Wet Sharpener

Model **708015**. This is not just another sharpener; Jet has done their homework on this one and loaded it with features. A few of the obvious ones include an enclosed motor housing to keep debris and water from the interior of the tool, a variable speed control to maintain optimum outer wheel speed as the diameter of the stone decreases due to wear, a torque adjustment that applies consistent pressure to the drive shaft, an oversized water tray with a flared edge and molded top to capture water runoff during sharpening, a built-in storage tray for easy access to sharpening accessories, and a diameter scale that provides a quick visual reference of the wheel's diameter. The 10" wheel is powered by a 1.8 Amp, 120V induction motor and is adjustable from 90 to 150 RPM.

Basic unit includes: stone grader, straight edge jig, magnified bevel checking gauge, grinding angle set-up jig, support arm, honing compound and training DVD.

- 834660** sharpener ..... \$399.99
- 834682** replacement 10" wheel .... \$124.99
- 834683** replacement leather strop..\$39.99

In Kit: CB, TR, CR, HC, CM

### Save With A Master Kit!

Not sure what accessories you'll need? We've organized these kits by woodworking interest – each includes a Jet Slow Speed Wet Sharpener and everything you need to keep all the tools in your shop razor sharp. Use the kit codes to determine exactly what's in each kit.

- Cabinetmaker's Master Kit**  
**834660CB** Save \$24.....\$599.99
- Woodturner's Master Kit**  
**834660TR** Save \$19.....\$589.99
- Woodcarver's Master Kit**  
**834660CR** Save \$19.....\$579.99
- Home Craftsman's Master Kit**  
**834660HC** Save \$15.....\$539.99
- Complete Master Kit**  
**834660CM** Save \$80.....\$899.99

## Choose Just The Individual Accessories You Need – Buy 3 Or More And Save 10%

**Grinding Angle Set-up Jig**  
Sets the proper bevel angle in relation to the stone wheel.  
**834665** ..... \$14.99  
\*Included with sharpener.

**Straight Edge Jig**  
For chisels, spokeshave blades and plane blades.  
**834668** ..... \$29.99  
\*Included with sharpener.

**Support Arm SA-1**  
Comes with grinder, but a second arm greatly increases sharpening efficiency.  
**834663** ..... \$29.99  
\*Included with sharpener.

**Stone Grader**  
Dual surface lets you dress the wheel for fine or coarse sharpening.  
**834661** ..... \$19.99  
\*Included with sharpener.

**Bevel Checking Gauge**  
Magnifier and scale establish angle of a cutting edge.  
**834666** ..... \$5.99  
\*Included with sharpener.

**Axe Jig**  
For all axes and hatchets.  
**834677** ..... \$12.99  
In Kit: HC, CM

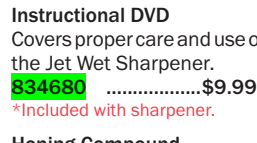

**Long Knife Jig**  
For knives and drawknives over 4" in length.  
**834672** ..... \$39.99  
In Kit: CM

**Side Wheel Grinding Jig**  
Used with the TR-1 Tool Rest to sharpen card scrapers.  
**834675** ..... \$14.99  
In Kit: CB, CM

**Machine Cover**  
Protects sharpener when stored or transported.  
**834664** ..... \$19.99  
In Kit: CB, TR, CR, HC, CM

**Instructional DVD**  
Covers proper care and use of the Jet Wet Sharpener.  
**834680** ..... \$9.99  
\*Included with sharpener.

**Carving Tool Jig**  
For both gouges and V-tools less than 1" wide.  
**834673** ..... \$19.99  
In Kit: CR, CM

**Knife Jig**  
For knives, drawknives and cutlery up to 4" in length.  
**834670** ..... \$27.99  
In Kit: HC, CM

**Diamond Truing Tool**  
Trues stone surface before and after use.  
**834669** ..... \$59.99  
In Kit: CB, TR, CR, HC, CM

**Profiled Honing Wheel**  
For V-tools, gouges, & other hard-to-hone profiles. Leather.  
**834676** ..... \$39.99  
In Kit: TR, CR, CM

**Scissors Jig**  
For scissors and garden tools.  
**834674** ..... \$34.99  
In Kit: HC, CM

**Plane Camber Jig**  
For sharpening and setting a controllable camber on plane blades up to 3" wide.  
**834678** ..... \$99.99  
In Kit: CB, CM

**Turning Gouge Jig**  
For fingernail and side grinds on bowl and spindle gouges.  
**834671** ..... \$59.99  
In Kit: TR, CR, CM

**Optional Base**  
Adds two additional storage drawers and a cord wrap.  
11" x 16"  
**834667** ..... \$99.99  
In Kit: CM

**Tool Rest TR-1**  
For freehand sharpening of scrapers, inshaves, scorpis & just about any edge tool.  
**834679** ..... \$29.99  
In Kit: CB, TR, CM

**Support Arm Extension**  
Creates a dual tool rest configuration for quick transition from grinding to honing.  
**834681** ..... \$19.99  
In Kit: CM
